## The Security Network <sup>SM</sup>

Fostering Innovation Through Collaboration <sup>SM</sup>

**Sept. 24-25, 2008**

### The 1st annual “C4, Robot Platforms & Sensors Exposition & Conference”

**The Security Network** will hold the 1st annual “**C4, Robot Platforms, and Sensor Conference: Ensuring Secure Information Sharing from Sensor to Responder Conference**” on Sept. 24-25. SPAWAR Systems Center (SSC) San Diego is the lead C4 ISR center for the Navy, which has attracted defense contractors interested in the field to San Diego. SSC is also an important factor in the explosion of robotics work in San Diego, including air, ground and on and below the water. **The Security Network** plans to focus this annual conference in San Diego on the continuum “from sensor to responder” including the necessity to emphasis *Identity Management* and *Information Assurance* in an increasingly open standards, interoperable world. There will be speakers and panelists from government agencies such as CA Office of Homeland Security, DHS S&T, NSA, SPAWAR, SPAWAR Systems Center and the US Navy in addition to representatives of leading companies in the private sector. There will be a technology Exposition as part of the Conference. For information, please e-mail [nhallett@thesecuritynetwork.org](mailto:nhallett@thesecuritynetwork.org).
