

## 2<sup>nd</sup> annual C4ISR, CyberSecurity, Robots Platforms & Sensors Conference

Tues/Wed. 6-7 October 2009

and the

## ISSA San Diego Chapter Annual SecureSD Conference

Tues. 6 October 2009

**Location:** Hall of Champions (in Balboa Park), San Diego, CA

The Mission of **The Security Network** is to advance security by “Fostering Innovation through Collaboration” worldwide. The non-profit, non-partisan **The Security Network** promotes rapid commercialization of dual usage security technologies and development of effective regional security. This conference is focused on some of the most exciting and fastest growing security markets in the world that also correspond to security technology strengths of San Diego – **C4ISR, CyberSecurity, robotics, secure communications, and sensors of all kinds**. One goal of this conference is to build awareness locally, regionally, nationally and internationally of these world-class strengths in San Diego.

The Mission of the San Diego area chapter of the Information Systems Security Association (ISSA) is to represent information assurance professionals by:

- Providing a supportive forum for the exchange of ideas pertaining to information security practices
- Educating entry level members in information assurance theory, technology, trends, and practice
- Fostering networking, community of interest opportunities, and professional growth
- Supporting technical certification of members
- Being the moral and ethical standards that ISSA advocates

**The Security Network** is pleased to manage the ISSA San Diego Chapter 2009 “SecureSD” annual conference, which will be co-located with day one of **The Security Network** conference. Our goals are complementary – to build awareness locally, regionally, nationally and internationally of world-class strengths in San Diego in IA/CyberSecurity and to promote the study and aggressive implementation of Smart CyberSecurity.
